**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eugene Liberstein on 08/23/2005.

The application has been amended as follows:

In Claim 26, Line-2, At the Begin **DELETE** 'sulphonic' and  
**REPLACE** with --sulphonic--

In claim-26, Line-8, **AFTER** 'equals' **DELETE** '1 or 2, or' and **INSERT** -2, in which case said sulphonic or phosphonic acid meets the formula

or--

### **Reasons for Allowance**

Claims 1-4, 7-12 and 15-28 are allowed as amended over the arguments by the applicants filed 08/04/2005 and the unexpected superior conductivity of the polyaniline (PANI) films doped with the specific esters of 4-sulfophthalic acid that is about Five orders of magnitude greater than the prior art conductivity values for 5-sulfophthalic acid ester doped PANI films. Prior art of record neither teaches nor suggestive of the applicants composition for manufacture of doped PANI films, composition for manufacture of a conductor composite containing doped PANI, an electrically conductive composite of a matrix containing an insulating polymer and doped PANI, a doped PANI film, wherein the critical feature in all the claimed inventions being the specific esters of 4-sulfophthalic acid as the dopants for PANI with unexpected results that moots the obviousness over the prior art.
